Support these organisations to help raise funds and awareness

LUPUS

In Australia, 1 in 400 people have Lupus, which means over 40,000 cases...
...between the ages of 15 and 44 years.

Currently, lupus is one of the most under-recognised and under-funded chronic illnesses. With such prevalence and possibility of fatality, public awareness of this illness needs to improve and this City2Surf event will serve as the foundation for all future advocacy work.

Please HELP Us Solve the CRUEL mystery....
